WORK EXPERIENCE

Freelance Web Development

Austin, Texas

Sullivan Ministries

July 2022 – Present

- Designed and created a functional ecommerce website using Next.js, Snipcart API and Figma
 - Framework
 - Utilization of Next.js to improve the loading and updating of dynamic content within the browser
 - Encryption
 - Analyzed PCI compliance specifications and concluded that the Snipcart API's encryption was viable, making each purchase secure
 - Design
 - Worked alongside a client to create a user-friendly layout, registered domains and delivered design solutions as requested.

Freelance Web Development

Austin, Texas

Arbiter Roofing,

February 2022 – April 2022

- Designed and created a dynamic company website using React.js, Express.js, Email.js and React Spring
- Implemented a dynamic automated email system, utilizing Email.js
- Employed Express.js to improve load times and User Experience
- Designed website using Figma while heavily considering SEO and User Experience

MyFlexibleFoods

Austin, Texas

Owner

June 2022 – Present

- Designed and created a food management and recipes application using React.js, Express.js, the Spoonacular API and React Spring
 - Functionality
 - Utilization of the Spoonacular API's complex food ontology, allowing MyFlexibleFoods to pull recipes and understand the relationships between ingredients, recipes, nutrition, allergens, and more.
 - Functional calorie calculator, used to calculate anyone's daily caloric limit
 - Design
 - Designed using Figma with User Experience and SEO heavily considered
